

PAUTHO VISION FOR WOMEN EMPOWERMENT

(VIWE) UGANDA LTD

AUGUST REPORT

This report consists of the activities that transpired during the month of August;

Activities

Loan disbursement.

We are happy to report to you that loan disbursement were successful being one of our major activities in PAUTHO.

Before giving out loans, many groups and individuals were assessed and indeed they qualified to receive loans. Am glad that in August many groups and individuals received loans which has not left them the same.

Assessment of members for loans

Both groups and individuals were assessed. As PAUTHO, we preferred that group loans would be better than individual which is 95% correct because when members come together there is a lot to share that's to say business ideas, health aspects and others. But we also realized that there members who have been in groups and are outstanding in repaying their loan dues so we decided to assess them individually and you find out that some members can handle loans and businesses individually especially some of the old members of KWAYA whom we have dealt with before.

PAUTHO being an organization whose goal is to empower needy women, you also find out that there some active poor and dormant poor so as PAUTHO we decided to go with the active poor meaning they are ready to move out of poverty as we continue to sensitize the dormant poor

to also come out of their comfort zone to start working hard so that they can also benefit from this project.

Loan recoveries.

Am extremely happy to let you know that loan recoveries have been made in this month despite the fact that there were no follow ups to remind the members to pay their loan dues.

Am happy that many members have now realized that (PAUTHO) loans are so helpful since they are taken at a very friendly interest rate and it's paid in installments which is not found in other micro credit organizations. So some members pay their loan dues very fast in order to get other bigger amounts in form of loans which is also a sign of growth.

Project assessment/ monitoring and evaluation.

Despite the corona pandemic, we have not just sat back to see our members relax and their projects collapse. We have always taken initiatives to check on their project, where things are not going right in their projects or businesses we come in to advice on how to go about it. We are happy to let you know that many projects are doing well and those that started small are gradually growing and we hope for the best in the nearby future.

Savings.

Our savings have been on despite the current corona crisis. Members have continuously turned up to save on Fridays. They come one by one to save following government directives so that they are able to meet their end of year targets which is so inspiring.

Conclusion

Our sincere appreciation goes to the Germany team especially Buch-Action for the great support towards PAUTHO VISION FOR WOMEN EMPOWERMENT (VIWE) UGANDA LTD despite the pandemic, may the Almighty God bless you abundantly.
