

## **PAUTHO VISION FOR WOMEN EMPOWERMENT**

### **(VIWE) UGANDA LTD**

#### **APRIL REPORT**

**2021**

#### **Introduction**

This report gives full details of the activities that transpired in the month of April and these include;

#### **Assessment of members' for loans**

We are very happy to report to the team that in the course of the month of April, we visited a number groups in which we assessed and considered the old and new groups that were found fit for soft loans and these received their loans as requested.

#### **Monitoring and assessment of projects**

We visited and monitored our old group and we observed that they run a number of projects like local brewing, selling vegetables, bricklaying, tailoring, hawkers of second hand clothes and shoes, piggery, poultry, charcoal burning and other projects. We also observed that our clients are very happy, appreciative and promising improvement in their household incomes since they are engaged in income generating activities as mentioned above. Indeed their standards of living are improving.

**Loan recoveries**

We take this pleasure to report that our group beneficiaries were so cooperative by repaying their soft loans on time. Actually, they always confess that the period given to them is conducive for them to recover the money so they find it very easy to service their loans and as PAUTHO we also find it so easy to work with them since they do everything willingly.

**Loan disbursement**

Many groups in different parishes which applied for soft loans from our organization were able to access soft loans according to their qualifications and we are very hopeful that they will use this money appropriately since they are very promising. We have a variety of clients who would wish to enroll for our services since they are friendly but sometimes we put them on hold because of the limited resources.

**Conclusion**

We take this opportunity to thank Buch.Aktion for their tireless efforts towards the growth and development of communities in Mbale and Uganda at large. And we are always very happy to inform the team that there is a gradual improvement in social and economic livelihood among our group beneficiaries which one of our objectives.
