

## **PAUTHO VISION FOR WOMEN EMPOWERMENT**

**(VIWE) UGANDA LTD**

**MARCH, 2022**

**REPORT**

### **Introduction**

Here is the summary of the activities that were reached on in the March, 2022.

### **Monitoring / assessment of Projects**

We assessed some of the groups and individual projects, and here are some of the observations;

Most of our members have tried to work hard to maintain the projects they started with our soft loans from the very beginning to stand with the supervision and guidance we render to them through our visits. And this has made it easier for us to monitor and understand how each individual within a group is progressing.

Some members confess that they now feel comfortable with PAUTHO loans since they are almost interest free and the mode of repayment is very friendly as compared to other credit financial institutions.

Projects of our beneficiaries are progressing steadily and you notice all this while on ground and confirm the improvement. Some of them have what to show, for example Kakai Abias from

Shikundu yetana women started piggery farming with only one pig, but at the time of visit, she has more than fifteen pigs/piglets and she attributes her success to our softloans. Namuwenge Rehema from Bumaena determined to develop who started with brick laying has as per now expanded her project and through the profits made, she has been in position to start another project of horticulture with in the same parish hence creating room for other people (women and youths) to join and work together as they improve their standards of living with the profits they get.

The community is very welcoming and appreciative for the services being rendered to them by our organization

### **Loan Recoveries**

We bring to your attention that most of the beneficiaries are working hand in hand to make sure that they are paying back the soft loans on the agreed dates as signed on the agreement forms. And though we are being impressed by the majority of the groups in repaying back their softloans on time, there are a few groups who have got difficulties in clearing there soft loans in the agreed time for example Buyaka "B" bamayi rula mwilo, Bumakika trading center and Buwalibitsa lower group. We as a team, we are trying to use all the criteria and methods to make sure that this groups clear their loans since they are pending. Amidst other financial needs like school fees, we were able to recover some good amount of money from our beneficiaries.

### **Loan Disbursement**

In March, Loans were disbursed to some of the groups who had cleared their previous softloans and they are running a number of different projects like local brewing,vegetable selling and growing,resturants, bricklaying,fruit selling,piggery,poultry,selling second hand clothes,dealing in mobile money and baking to mention but a few. And these include; Bumakika yetana farmers group, Shikundu women Ambanilakho group, Watsombe women group and many others as we hope for better results tomorrow.

### **Conclusion.**

In conclusion therefore, our beneficiaries are promising, hardworking and co-operative. They are exhibiting social and economic development among their communities. As a team on the ground, PAUTHO loans are life transformers and we wish to express the love and appreciation of our beneficiaries to you our dear funders. And ask for more provision.
