

PAUTHO VISION FOR WOMEN EMPOWERMENT

(VIWE) UGANDA LTD

OCTOBER 2022

REPORT

Introduction;

This report contains the general of activities that were reached on in the month of October, 2022 and these include;

Projects Assessment

In order to ascertain the impact of the organization to the community, we were able to visit a number of our beneficiary groups in the communities of Bukiende Sub County and here are some of the observable progress;

As noted earlier in the previous reports, our beneficiary members are engage in a number of beneficial activities and these included but not limited; charcoal burning and selling, retail shops, small saloons, poultry keeping, piggery, tailoring, produce, bricklaying, fish mongering, local brews, fresh vegetables, ripe bananas, horticulture and among others and there's observable steady progress among the community beneficiaries.

Wakhasa Jalia from Nabikhoso "A" Wele niye unyala byosi development group in Bumaena parish is dealing in bricklaying has improved her house by plastering the wall and fitting in metallic

windows and doors and she attributes her achievement to our organization's loan. Nakami Salika from the same group has bought iron sheets with the profits made from PAUTHO loans with intentions of setting up a permanent house.

The organization is answering the problem of unemployment gap among the communities since the beneficiaries are being empowered financially and are they engaged in daily income generating activities.

There is also financial independence among the vulnerable mothers in the community. Most of them no longer depend on anybody since they are earning some profits from their projects on daily basis.

There is social networking and social responsibilities among the beneficial groups. Most members come together and share ideas in line with their projects. Do savings and micro credits together.

In the month of October, we extended our mobilization and sensitization to more vulnerable women in the communities of Nyondo sub-county and Nabumali Town Council and they highly welcomed our training. We already have two groups from Nabumali Town Council happily working with us.

Loan recoveries

With great pleasure we would like to report that amidst the hard economy in the country, our beneficiaries are co-operating by remitting their soft loans though some are not remitting in as expected. Were we also able to recover some good amount of money from Kwaya group and that's one of our achievements this month.

Loan disbursement

In month of October 2022, we assessed and disbursed some amount of money to the individuals (Kwa Moyo staff) and some groups like Nabikhoso "A" Wele niye unyala byosi development group, Bushangi traders group, Shikoye women group, Shaala Sikhana and Savings group and among others.

Conclusion Grateful we are to our noble team for their continuous support rendered towards the organization in order to meet its set objectives of improving the wellbeing of vulnerable women in the communities.
