

PAUTHO VISION FOR WOMEN EMPOWERMENT

(VIWE) UGANDA LTD

JANUARY REPORT, 2023

Introduction

This report explains the main activities that transpired in the month of January, 2023.

Activities

Projects assessment

We started the year 2023 by checking and assessing the progress of projects and the impact of the organization to the community and we ascertained some of the following;

The standards of living among some of the hardworking members is improving steadily and this is due to the profits made from PAUTHO loans. Members are venturing in different kinds of businesses such as Bars, restaurants, Produce, tailoring, food vending, retail shops, stalls (selling of different food stuffs), charcoal burning and selling, piggery, poultry, fish selling, horticulture and among others and as a result, members are constructing permanent houses, buying pieces of land.

Out of the profits made, members are educating their children for example; Nambuya Alice from Bumaena byosi Binyalikha development association group attributes that she was able to meet

the school dues for her daughter at tertiary institution (Uganda Christian Institute-Lira) and the daughter is soon graduating. And some other members are also doing the same to their children.

These our loans are reducing unemployment gap in the communities since most of members are busy in engaged in different income generating activities.

To widen our scope of service, we were able to mobilized and train more groups and some have already submitted in their files for consideration.

Loan Recoveries

We gladly write to inform the team that we were able to recover some good amount of money from the committed, hardworking and co-operative members in remittance form. Though there some defaulting members but we have taken legal actions against them and we are hoping for a positive response.

Loan disbursement

We were able to give out some amount of money to both new and old groups. Before we give them loans, we offer them with financial guidance in order for them to use loans appropriately.

Challenges / Way forward

There is delay among some beneficiaries who tend not to pay back there soft loans on time as it was agreed in the agreement.

We as the team on ground, have decided to work together with the security (police force) to make sure that we recover back the organization moneys.

Conclusion

In summary, the is organization now covering the communities of Bukiende sub county, Nyondo sub county, Nabumali Town council and the target is to cover the whole Uganda in the nearby future with the help of our noble funders. As a team on ground, we cannot forget to express our heartwarming appreciation to the team behind the growth and sustainability of the organization.
