

PAUTHO VISION FOR WOMEN EMPOWERMENT

(VIWE) UGANDA LTD

REPORT MARCH, 2023

Introduction;

This report comprises the detailed activities that were reached on in the month of March, 2023

Activities;

Monitoring of projects

In order to assess our progress, we were able to move and check on some of the beneficiary groups and individual projects, and here we observed the following.

There is gradual and steady improvement of livelihood among some of our hardworking members. Most of our beneficiaries are engaged in income generating activities (IGAs) as indicated in our previous reports, hence improving standards of living.

Good working relationships and spirit of togetherness was observed among our beneficiaries.

Good progressing reports from our clients have created a lot of awareness among the community and we have got so many thanking messages from the community which is a good reputation for our organization,

Most vulnerable women are very committed due to financial help extended to them.

Recoveries

We gladly write to inform our funding team that our members were cooperative in repaying their soft loans to the organization. Amidst other financial challenges, we were able to recover most of our revolving funds from them. Though there are some few individuals who are struggling to repay their soft loans due to understandable circumstances like sickness, paying school fees for their children etc. we are very optimistic.

And for those who are defaulting, we had to take legal action on them.

Loan Disbursement

Loan disbursement takes the center among other activities and we kindly report that we disbursed some amount of money to individuals and groups. We offer financial guidance to the beneficiaries before accessing their soft loans.

Conclusion

The community is very appreciative to our dear funders for their, commitments, enormous and tireless support rendered towards the sustainability of the organization through meeting its set objective of empowering vulnerable women in the communities of Mbale.
