

## **PAUTHO VISION FOR WOMEN EMPOWERMENT**

### **(VIWE) UGANDA LTD**

**SEPTEMBER 2023**

### **REPORT.**

#### **Introduction;**

This report explains about the activities that were carried during the month of September 2023

#### **Activities;**

##### **Monitoring of projects**

During this month, projects were not visited as it has always been in previous months but some were visited during recovery since we meet some of the women at the places where they are operating their business/projects from and we noticed during this time that most of our beneficiaries have improved in their business not as they were in the beginning.

##### **Recoveries**

We as a team in Uganda, we would like to inform you in this report that the repayment of soft loans was done as per some group who tried as much as possible to follow their agreement date. And some groups who are finding challenges in repaying back their soft loans have been encouraged to pay on the due dates as this will help the organization to achieve its set goals.

Legal action has been taken on the beneficiaries who have stayed with the organization money for more than six months, this has been done through involving the police and the local councils (LC1) of the area in getting back the money from the women who are our beneficiaries. And the

involvement of the above body has brought an impact in getting back most of the money as in due date, some of the groups are clearing their loans as we are looking forward towards having all the money back from all those who have due dates.

### **Loan Disbursement**

Due to a lot of money which is outside inform of open loans, loan disbursement was put on hold for the month September to all beneficiary groups apart from Kwa Moyo staff who are eligible to have loans from PAUTHO.

### **Challenges**

Moving with the police who are dressed in their working uniforms has brought about tension in the area we are working in.

Fuel prices have also gone high, which is a little costly since we are riding several times to a lot of groups daily.

### **Conclusion**

We would like to send sincere thanks to our funders for the continued support you have always rendered to Pautho as an Organization which is also helping in transforming the lives of the women in the communities of Uganda, Mbale district is an example.
