

## **PAUTHO VISION FOR WOMEN EMPOWERMENT**

### **(VIWE) UGANDA LTD**

### **REPORT MARCH 2024**

#### **Introduction:**

Here you will find the detailed activities that were carried out during the month of March 2024.

#### **Activities:**

##### **Monitoring of the projects**

This month some projects were visited and we met the women at the places from where they run their businesses/projects. In the process, we discovered that some of our beneficiaries, both those who have closed their loan balances and others who are still servicing their loans, have seen their businesses/projects decline because the Pautho loans that supported them to boost their businesses have been put on hold.

##### **Recoveries**

We as the team in Uganda would like to inform you that the repayment of soft loans has been made to some groups e.g. Bushangi Traders Group and Kitndya Yetanna Women Group who have been trying their best to meet the agreed deadlines. Some groups have managed to clear their loan balances. But those who are struggling to repay their soft loans have been encouraged to pay as their due date on the agreement forms has already passed. If this does not happen, the groups will be represented by a lawyer, which will ease the process of repaying the Pautho funds. Some groups that were first represented by a lawyer have responded positively. But those who have not paid will be taken to court by the lawyer, which will enable the organization to achieve its goals.

**Conclusion**

We would like to thank our donors for their continuous support to Pautho as an organization that is also helping to transform the lives of women in communities in Uganda.
