

PAUTHO VISION FOR WOMEN EMPOWERMENT

(VIWE) UGANDA LTD

REPORT MAY,2024

Introduction

This report comprises the detailed activities that were reached in the month of May 2024.

Monitoring of projects

To assess our progress, I was able to move and check on some of the beneficiary groups and individual projects, and I observed the following.

There is gradual and steady improvement of livelihood among some of our hardworking members for example the ones of Bushangi traders and kitindya Yatana women group. They are engaged in income-generating activities (IGAs) as indicated in our previous reports, hence improving standards of living.

Good working relationships and a spirit of togetherness were observed among our beneficiaries.

Good progressing reports from our clients have created a lot of awareness among the community and i have got so many thanking messages from the community, which is a good reputation for our organization.

Most vulnerable women are very committed due to financial help extended to them.

Recoveries

I gladly write to inform our funding team that our members were cooperative in repaying their soft loans to the organization as per monthly installment

Loan Disbursement

It was only given to the Kwa moyo staff members and the group of Bushangi traders women group.

Conclusion

The community is very appreciative to our dear funders for their commitments, enormous and tireless support rendered towards the sustainability of the organization through meeting its set objective of empowering vulnerable women in the communities of Mbale.
