

PAUTHO VISION FOR WOMEN EMPOWERMENT

(VIWE) UGANDA LTD

SEPTEMBER REPORT 2024

Introduction;

This report comprises the detailed activities that were reached on in the month of September, 2024.

Monitoring and assessing of projects

In order to assess our progress, we were able to move and check on some of the beneficiary groups and individual projects, and we observed the following.

There is gradual and steady improvement of livelihood among some of our hardworking members for example the ones of Bushangi traders and Kitindya Yetana women group. They are engaged in income generating activities (IGAs) as indicated in our previous reports hence improving standards of living.

Good working relationships and spirit of togetherness was observed among our beneficiaries.

Good progressing reports from our clients have created a lot of awareness among the community and I have got so many thanking messages from the community which is a good reputation for our organization.

Most vulnerable women are very committed due to financial help extended to them.

We also resumed with the old groups of women which were being put on hold and received new more individual members and we assessed them. They were much pleased to work with us again

Recoveries

I gladly write to inform our funding team that our members were cooperative in repaying their soft loans to the organization as per monthly installment

Loan Disbursement

It was given to the Kwa Moyo staff members, new individual members and old groups which we started working with

Challenges

We had the challenge of power which was on and off, made our delays of work

We also had a challenge of the laptop and a printer which were down now and then leading to inconvenience of work

Way forward

We are looking forward of getting a new laptop and trying to look for the old groups which were doing well but we have not yet them reached all

Conclusion

The community is very appreciative to our dear funders for their commitments, enormous and tireless support rendered towards the sustainability of the organization through meeting its set objective of empowering vulnerable women in the communities of Mbale.
