

## **A COMPREHENSIVE REPORT FOR THE MONTH OF SEPTEMBER AND OCTOBER**

This report comprises of the various activities that took place in the months of September and October;

### **Activities:**

#### **Loan disbursement**

We wish to inform you that during these two months, we were able to give out loans to the different groups of PAUTHO both new and old. As we all know that as the project was expanded, we started creating new groups in different parts of Bukende Sub County. This has helped very many need and single mothers to come up with income generating activities which is trying to improve their lives both socially and economically.

#### **Assessment of members for loans**

According to the strategies we set from the beginning, we decided that members should be first assessed in order to know whether they are cable of repaying the loan and if the businesses they are going to start will work for them depending on the environment they are living in. We always realize that most of the members qualify and are worth these loans and some of them are our old members who are so hardworking which makes them approved for the loans.

### **Loan recoveries**

Am happy to inform you that loan recoveries was an amazing activities with the new groups and other determined members of KWAYA. The strategy of giving money in groups has really helped us as an organization because they help each other in different skills and other things which is real good for them in social and economic life. So in all this they are able to collect their money together for the repayments of loans and they don't default.

### **Project assessment / monitoring and evaluation of projects**

We have always taken an extra mile to check on the members' projects and we are glad to inform you that in the month of October we did it together with Thomas and the members were glad to see him and he was also impressed with the projects that he saw and I believe he will testify about it. Once more I wish to let you know that most of our groups and individual projects are doing well.

### **Savings**

As we have always kept on updating you about the KWAYA savings as our pioneer group, the members of KWAYA and other new groups have kept the fire burning and this activity has helped most of them to grow economically and socially by gathering together for savings since they share always gather on every Friday. Since they share this money at the end of the year, they use it to invest in new projects or use it to boost their already existing businesses and this applies to the new groups too.

### **Conclusion**

Lastly, our sincere gratitude to the members of Butch-Aktion for their tireless efforts towards the existence of PAUTHO. You have always created time to work for PAUTHO VISION FOR WOMEN EMPOWERMENT (VIWE) UGANDA LTD out of your busy schedules. May the God Lord forever enlarge your territories.
