

PAUTHO VISION FOR WOMEN EMPOWERMENT

(VIWE) UGANDA LTD

REPORT APRIL 2025

Introduction

This report focuses on the details of the activities that transpired in the month of April, 2025

Monitoring /Assessment of Projects

We are pleased to report to our noble team that during this month, we moved and assessed a number of beneficiaries both groups and individual and here are some of our observations;

The beneficiary members run a number of business projects as listed in our previous reports and a gradual improvement in their household income was observed hence improving their standards of living.

Most of the projects are doing well and those that started small have gradually grown and we are hoping for the best in the nearby future.

For example, M. L. from a women group who started small her retail shop and these loans has helped her to expand it.

Loan Recoveries

We made recoveries from our groups and individuals at their willingness to repay and also apply for new soft loans. We gladly report to the team that our beneficiaries are very cooperative in recovering their soft loans from our organization amidst this hard situation each and everyone is going through.

Though most of the groups are turning up to bring back their soft loans on time, there are a few who still have outstanding balances but we have tried to go through the local council (LC1) to encourage them to clear up their soft loans as agreed.

Loan Disbursement

It was being given to Kwa Moyo staff, groups and individual members in the community

Conclusion

We deeply extend our sincere thanks to all the team members most especially Buch-Aktion for their continuous and enormous support towards the sustainability of the organization. Indeed, there is new hope among these beneficiary families.
